WashDoor UI Project Documentation

washdoor v1.0.0 — Laundry & Dry Cleaning POS & Order Management Frontend Architecture

React 18.3.1 | Vite 5.4.11 | TypeScript 7.0.2 | Supabase JS 2.118.0 | 79 Source Files | 9 Languages (incl. RTL)

1. Tech Stack & Build Configuration

Layer	Technology / Package	Role in UI Project
UI Framework	`react@^18.3.1`, `react-dom@^18.3.1`	Component rendering, state hooks, portals, and responsive modals
Build & Dev Server	`vite@^5.4.11`, `@vitejs/plugin-react@^4.3.4`	HMR dev server on port `3000` and optimized bundle splitting
Type System	`typescript@^7.0.2`, `@types/react`, `@types/react-dom`, `@types/node`	Strict type checking (`allowJs: true`, `noEmit: true`)
Backend Client	`@supabase/supabase-js@^2.118.0`	PostgreSQL queries, mutations, and Storage garment photo uploads
Export Engine	`jspdf@^4.2.1`, `xlsx@^0.18.5`	Client-side PDF, Excel (.xlsx), and CSV generation

Entry Pipeline & File Inventory

- **`index.html`**: Loads Google Font `Inter`, runs an inline FOUC-prevention theme check against `localStorage` (`washdoor_theme_manual` / `washdoor_theme`), and mounts `/src/main.tsx` into `#root`.
- **`src/main.tsx`**: Wraps `<App />` in a typed `ErrorBoundary` and `LanguageProvider`; imports `styles/theme.css` and `styles/washdoor.css`.
- **`tsconfig.json`** & **`vite.config.ts`**: Targets `ES2022` with `jsx: "react-jsx"`, `strict: true`, defines `REACT_APP_SUPABASE_*`, and emits manual chunks `vendor` and `supabase`.
- **Source Inventory (`washdoor/src/` — 79 files):** `24 .jsx`, `28 .js`, `5 .tsx`, `6 .ts`, `14 .css`, `2 .json`. Five duplicate JS/TS migration pairs exist: `ClothIllustration`, `CustomerSearchPanel`, `ThermalReceiptModal`, `LanguageContext`, and `validation`.

2. Application Shell & Global UX (`src/App.jsx`)

`App.jsx` (1,254 lines) manages top-level routing state, keyboard shortcuts, localization, theming, and global order creation/edit modals.

7 Navigation Views (`NAV_ITEMS`)

- `dashboard` — KPI & pipeline summary
- `order` — Orders Register & Counter POS
- `customer` — Customer Master directory
- `report` — Reports & Audit Download Center
- `apps` — Connected Apps settings
- `account` — Store Settings & Profile
- `audit` — System & Order Audit Trail

Global Shell Capabilities

- Collapsible desktop sidebar + `280px` mobile drawer (`≤ 768px`)
- Shortcuts: `Ctrl+K` (Global Search), `N` (New Order)
- `Supabase Live` topbar status pill & Light/Dark theme toggle
- 8 Currencies: `INR` , `USD` , `AED` , `GBP` , `EUR` , `SGD` , `CAD` , `AUD`
- 9 Languages: `en` , `ta` , `hi` , `te` , `kn` , `ml` , `ar` (RTL), `fr` , `es`

3. Core UI Modules & Component Architecture

3.1 Dashboard Module (`DashboardModule.jsx` , 657 lines)

- **Welcome Banner:** Store overview greeting & status summary.
- **5 KPI Cards:** Today's Revenue, Orders Today, Collected Today, Outstanding Balance, Ready for Pickup.
- **Order Pipeline:** Visual counts for `Received` , `In Progress` , `Ready` , and `Delivered` .
- **Charts:** Revenue Trend (Last 7 Days — Booked vs. Collected) and Payment Mix Donut Chart.

3.2 Orders & Counter POS Module (`POSModule.jsx` , 6,035 lines)

- **Orders List Register:** Search, date range filter, status pills, service filter, 17-column manager (`orderColumnsConfig.js` : 9 default + 8 additional; `order_id` , `customer` , `actions` locked), Excel/PDF/CSV export, pagination (`5/10/20/50/All`), and an inline edit accordion (6 tabs + Garment Cart + `GarmentInspectionSection`).
- **Counter Intake Register (3-Column Layout):** Left garment catalog; Center active cart, GST, and care notes; Right customer lookup (`CustomerSearchPanel`), walk-in creation, service mode, payment mode, and hold action.
- **POS Modals & Portals:** `ScheduleDeliveryModal` (126L), `DriverAssignModal` (113L), `SideEditPanel` (1,811L), `ViewOrderModal` (581L), `ThermalReceiptModal` (289L), and `ServicesPopoverPortal` .

3.3 Order Creation, Review & Inspection Components

Component File	Lines	Primary Responsibility
`CreateOrderModal.jsx`	215	Shell modal coordinating customer selection, cart & order submission
`EditOrderModal.jsx`	808	Modal editor for order metadata, garments, payments & riders
`ClothSelectionCart.jsx`	523	Interactive garment catalog, quantity steppers & line-item pricing
`GarmentInspectionSection.jsx`	1,000	Per-garment condition checklist, fabric/stain tags & photo upload
`OrderReviewCard.jsx`	432	Pre-submission order summary, advance payment & price breakdown
`OrdersTable.jsx`	109	Tabular register renderer powered by `orderColumnsConfig`
`ClothIllustration.jsx` / `.tsx`	280 / 257	Vector garment category illustrations
`NoOrdersGraphic.jsx`	275	Empty-state SVG graphic when filters match zero orders

3.4 Customer, Reports, Audit & Settings Modules

Module / Component	Lines	UI Capabilities
`CustomerManagement.jsx` & `CustomerForm.jsx`	1,296 / 1,387	Searchable, paginated Customer Master; expandable bento profile cards (contact, DOB/age, comm prefs/DND, GST/credit/discount, multi-address, care notes); clipboard copy & CRUD modals
`ReportsModule.jsx`	1,021	Reports & Audit Download Center with presets (`today` , `7d` , `30d` , `month` , `all`), service/status filters & exports via `exportService.js`
`AuditLogModule.jsx`	582	4 KPI cards, 6 filter pills (`all` , `export` , `lifecycle` , `driver` , `payment` , `system`), search, sort toggle, merges Supabase + `washdoor_audit_trail_v1` + live `orders`
`SettingsModule.jsx` & `TemplateManagementSection.jsx`	2,177 / 1,519	Business profile (logo & map), Tax/Currency, Bank/Payments, Operations/Receipts, 18 notification templates (6 categories x 3 channels, 14 variables), Language, Apps modal & Account

4. Styling, Persistence & Verification

- **14 Modular CSS Files (`washdoor/src/styles/`):** `theme.css` , `washdoor.css` , `Dashboard.css` , `POSModule.css` , `CreateOrderModal.css` , `EditOrderModal.css` , `SideEditPanel.css` , `ViewOrderModal.css` , `ClothSelectionCart.css` , `GarmentInspection.css` , `ReportsModule.css` , `AuditLog.css` , `Settings.css` , `TemplateManagement.css` .
- **`localStorage` Persistence:** `washdoor_theme` & `washdoor_theme_manual` (theme state), `washdoor_audit_trail_v1` (audit log cache).
- **NPM Scripts & Baseline Checks:**
  - `npm run dev` / `npm start` — Starts Vite on port `3000` .
  - `npm run typecheck` — Executes `tsc --noEmit` .
  - `npm run build` — Executes `tsc --noEmit && vite build` (Verified passing: **502 modules** bundled).
  - `npm test` — Runs `node --test src/__tests__/*.node.test.js` (Observed baseline: `95/96` passing; 1 pre-existing CSS regex check in `sideEditPanelLayout.node.test.js`).

> **Companion Guide:** See `SUPABASE_INTEGRATION_GUIDE.pdf` / `SUPABASE_INTEGRATION_GUIDE.md` in `washdoor/` for PostgreSQL tables, RLS policies, Storage bucket setup, and backend service bindings.
