WASHDOOR POS

Order & POS Module — Complete Screen Documentation

Live Application Visual Guide | Captured from http://localhost:3000 | 11 Screens

Module Overview

The Washdoor Order & POS Module (POSModule.jsx) manages end-to-end laundry and dry-cleaning counter operations: order intake, garment & service allocation, staff & driver assignment, live status tracking, thermal receipt printing, invoice inspection, inline/side editing, and customizable table reporting.

01 Main Orders List Screen

Component: POSModule.jsx (Orders View)

Primary landing screen for the Orders & POS module. Displays live order counts by status, centralized search, column customization, export tools, and paginated order rows.

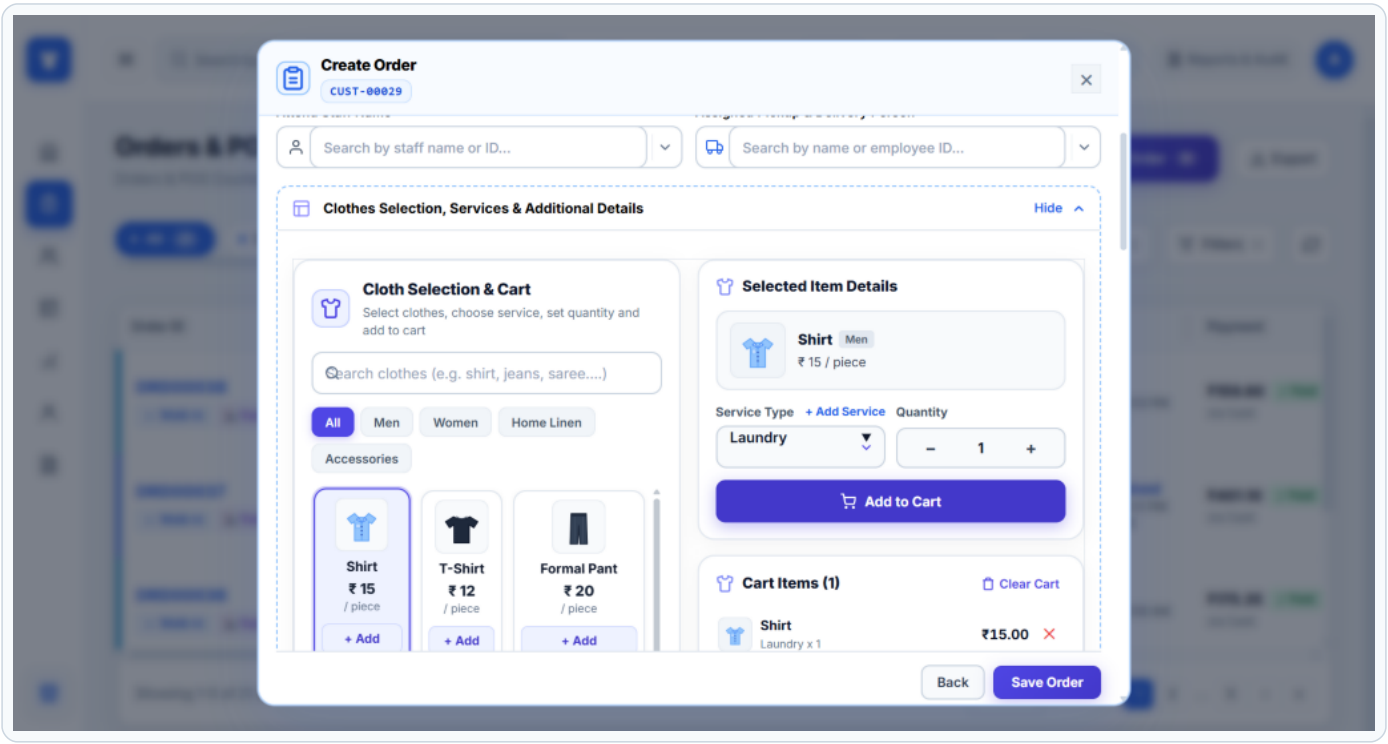

Key UI Elements, Fields & Actions

- Status Filter Pills: All, Order Received, In Progress, Ready, Delivered, and Cancelled with live counts.
- Toolbar Actions: + Create Order [N], Export (Excel / PDF / CSV), Columns (9 / 17), Filters, Reload records, and Ctrl+K search.
- Orders Table Columns: Order ID, Customer, Address, Services (+N More popover), Status, Payment, Order Details, Pickup & Delivery, and Actions.
- Pagination Footer: Showing 1-5 of N orders, page size selector, and page navigation buttons.

02 Counter Intake Register (+ Create Order)

Component: CreateOrderModal / Counter Intake View

Interactive POS counter intake screen for creating new laundry and dry-cleaning orders with customer lookup, staff assignment, garment selection, and instant billing.

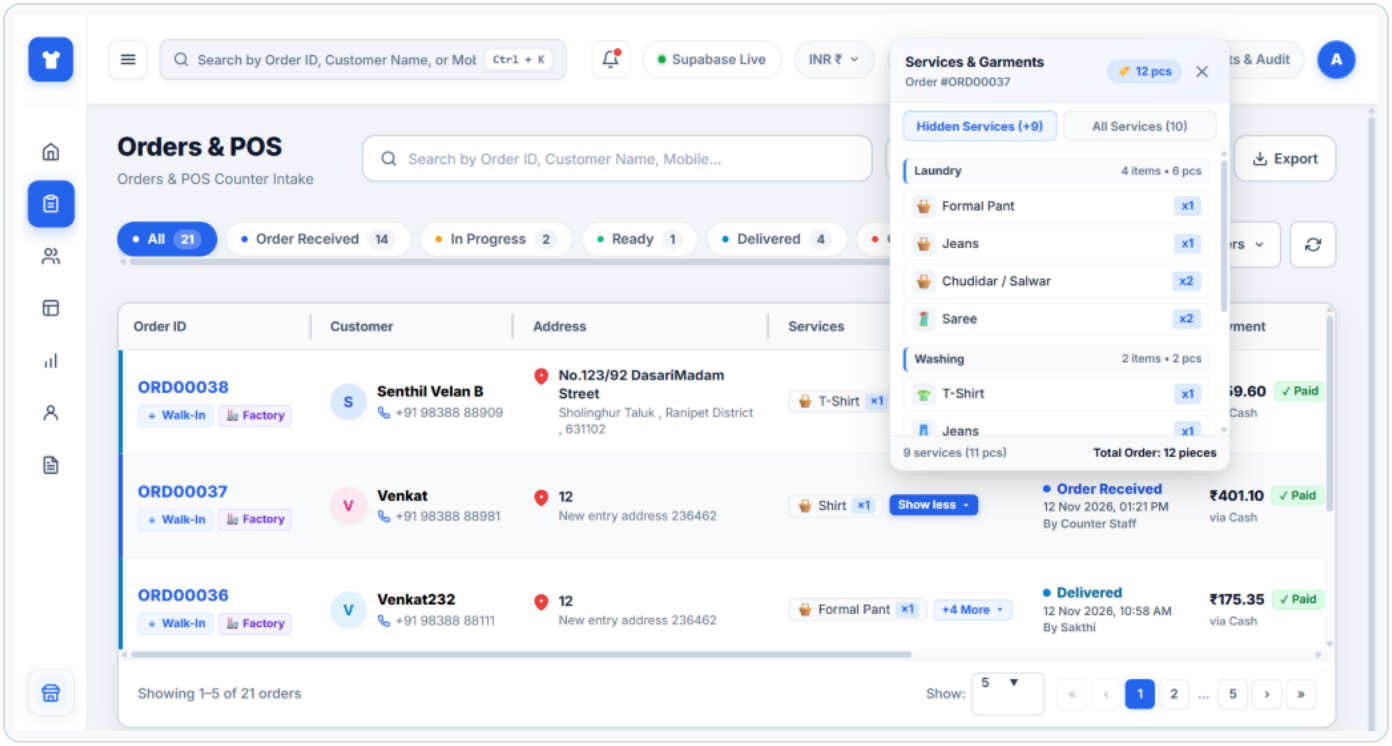

Key UI Elements, Fields & Actions

- Customer Lookup & Selection: Search existing customers by name, ID, or mobile number, or register inline.
- Staff & Dispatch Assignment: Searchable Attend Staff Name and Assigned Pickup & Delivery Person dropdowns (linked to Supabase masters).
- Garment & Service Selection Grid: Category tabs, per-service pricing (Wash & Iron, Iron Only, Dry Clean), and quantity steppers.
- Interactive Cart & Summary: Itemized bill, GST/tax calculation, discount support, payment method picker (Cash/UPI/Card), and Save & Generate Bill.

03 Services Breakdown Popover (+N More)

Component: ServicesPopoverPortal (POSModule.jsx)

Lightweight floating popover anchored to the +N More badge in the Services column, allowing staff to inspect every garment and service type without leaving the orders table.

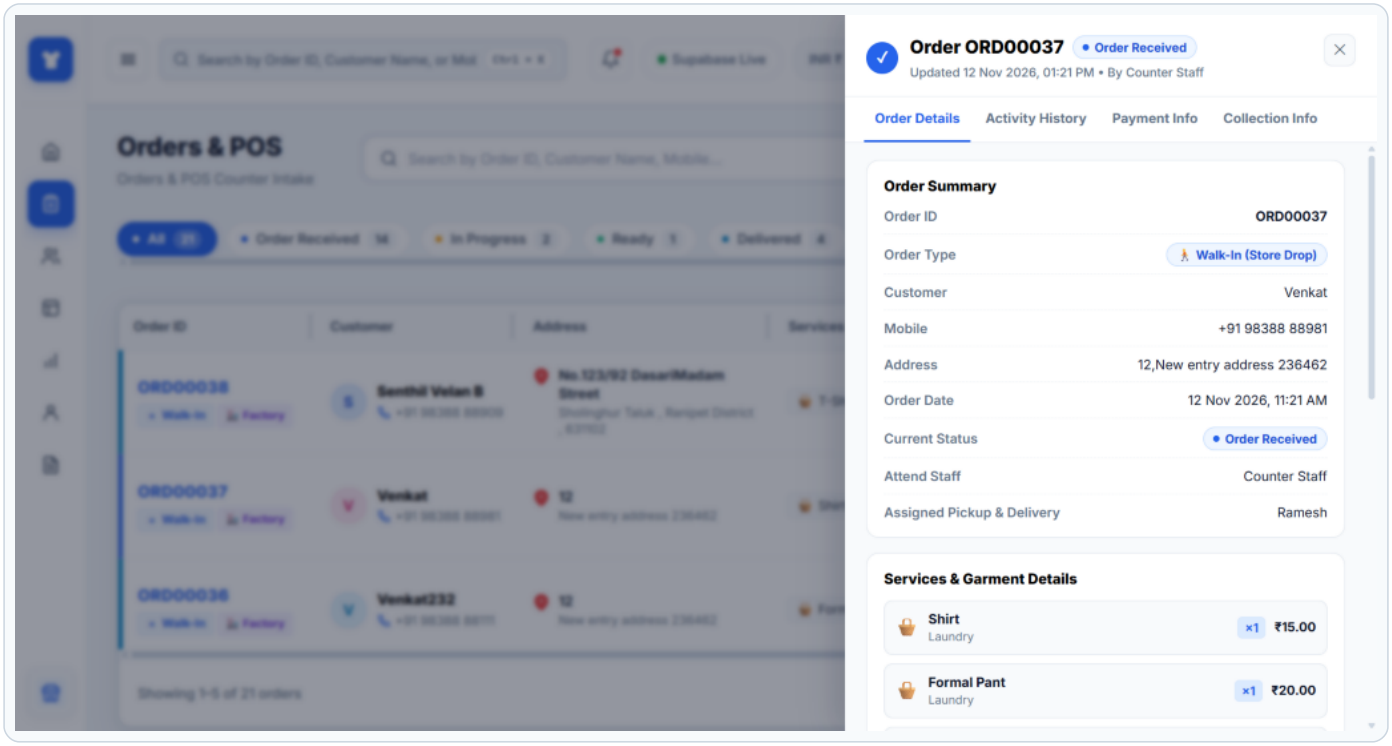

Key UI Elements, Fields & Actions

- Shows Hidden Services or All Services tabs with total garment piece count badge.
- Groups garments cleanly by service category with item icons, names, and piece quantities.
- Auto-positions below or above the trigger button based on viewport space and closes cleanly on outside click or X.

04 Order Status Side Panel - Order Details Tab

Component: OrderStatusSidePanel (POSModule.jsx)

Slide-over status management drawer opened by clicking any order status badge. Provides 1-click lifecycle transitions and full order/staff/payment context.

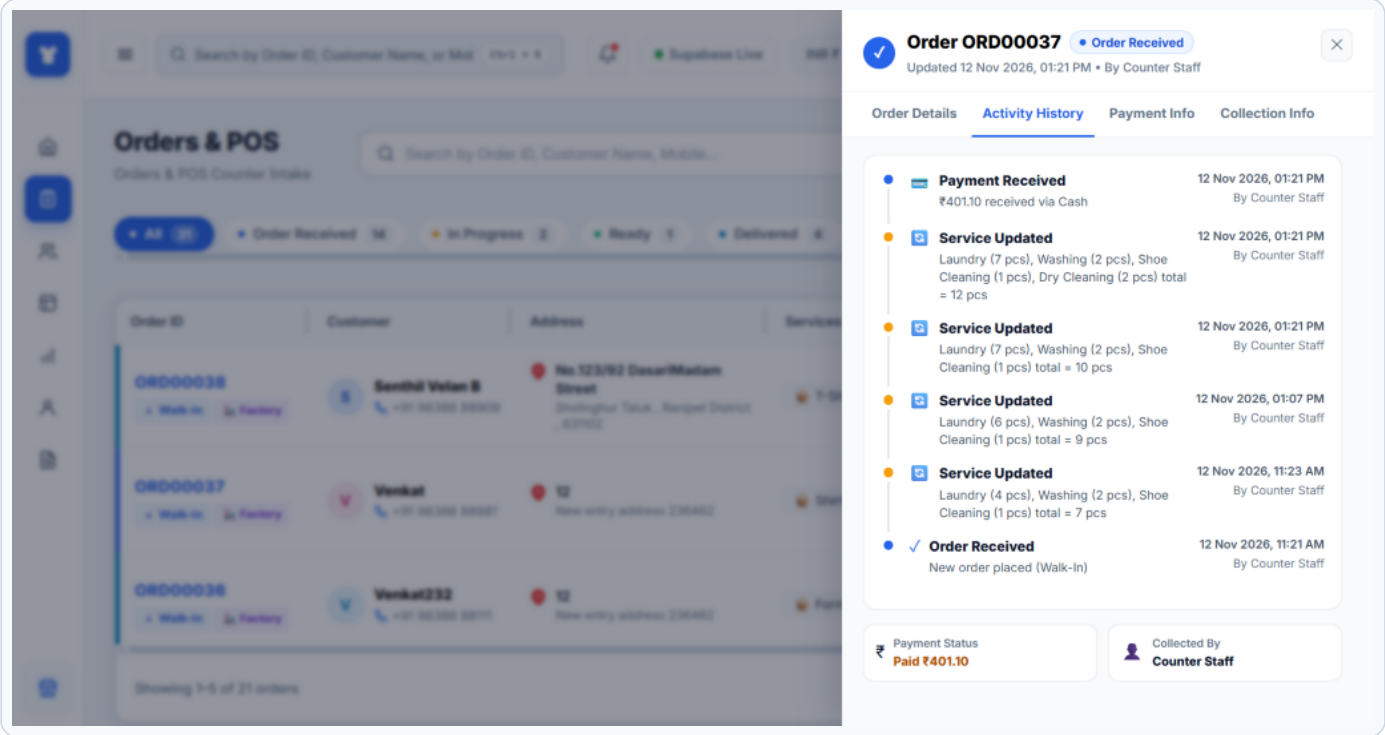

Key UI Elements, Fields & Actions

- Visual 4-stage lifecycle stepper: Order Received -> In Progress -> Ready -> Delivered.
- Displays Customer profile summary, Payment status & method, Attend Staff Name, and Assigned Pickup & Delivery Person.
- Includes quick-action buttons to advance status, schedule delivery, or assign a driver.

Order Status Side Panel - Activity History Tab

Component: OrderStatusSidePanel (Activity Tab)

Chronological audit timeline inside the Order Status Side Panel tracking every status update, driver assignment, and payment event for the order.

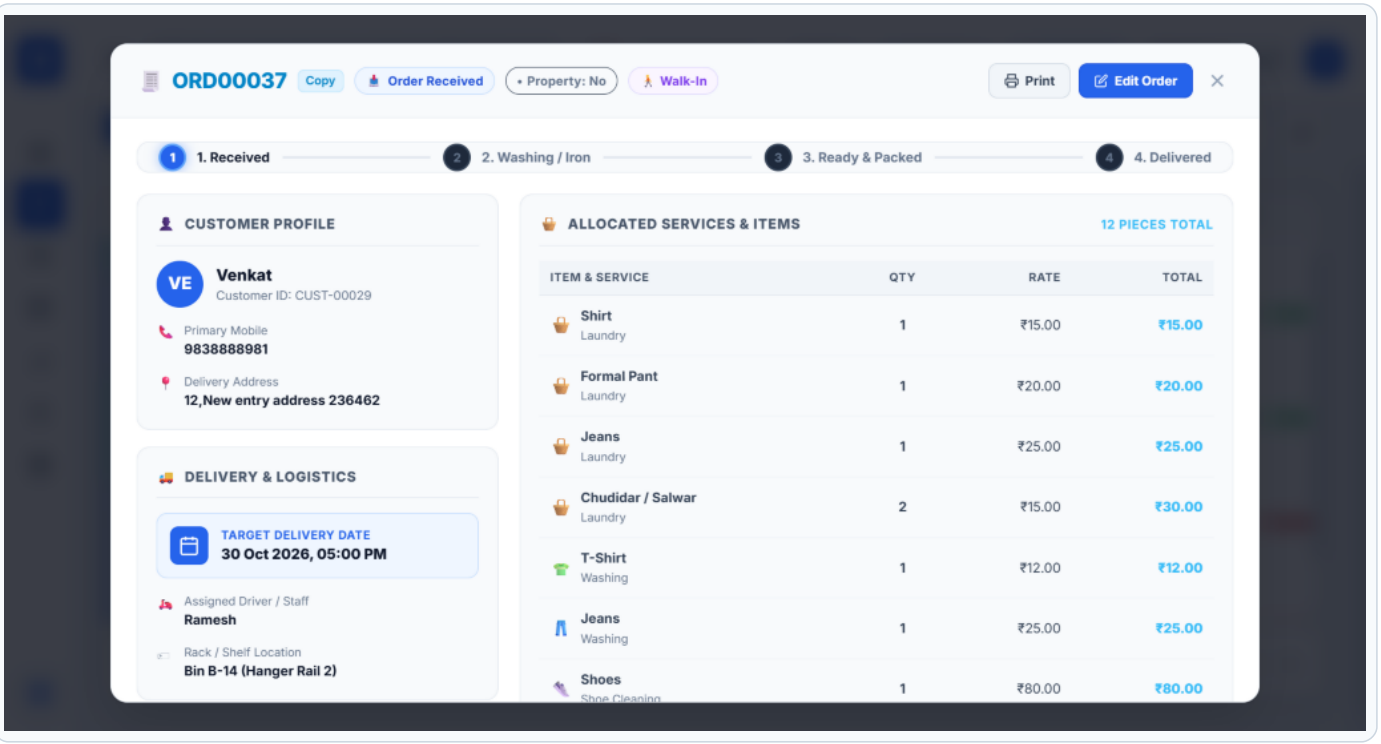

Key UI Elements, Fields & Actions

- Lists timestamped lifecycle events from initial order creation through delivery.
- Attributes each action to the staff member or system trigger for full operational traceability.
- Complements the Payment Info and Collection Info tabs in the same drawer.

06 View Order Modal (Invoice & Summary)

Component: ViewOrderModal.jsx

Read-only full-order inspection modal presenting customer details, staff/driver assignments, itemized garment lines, and complete tax/payment breakdown.

Key UI Elements, Fields & Actions

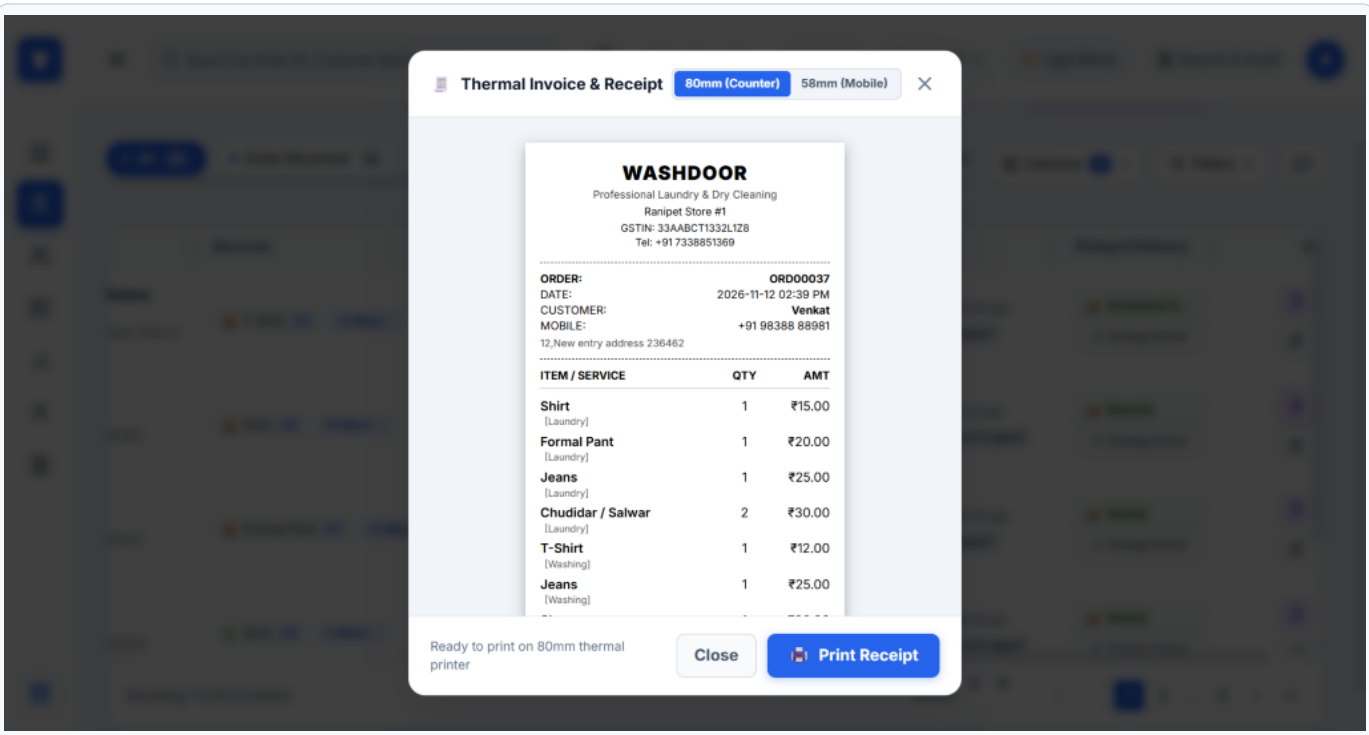

- Header displays Order ID, current status pill, and order creation date/time.
- Itemized garments table with service types, quantities, unit rates, and line totals.
- Financial summary showing Subtotal, CGST, SGST, Net Total, and Payment Mode.

07

Thermal Receipt Modal (80mm POS Print)

Component: ThermalReceiptModal.jsx

Print-ready 80mm ESC/POS thermal receipt preview formatted for counter printers, with PDF download and WhatsApp sharing.

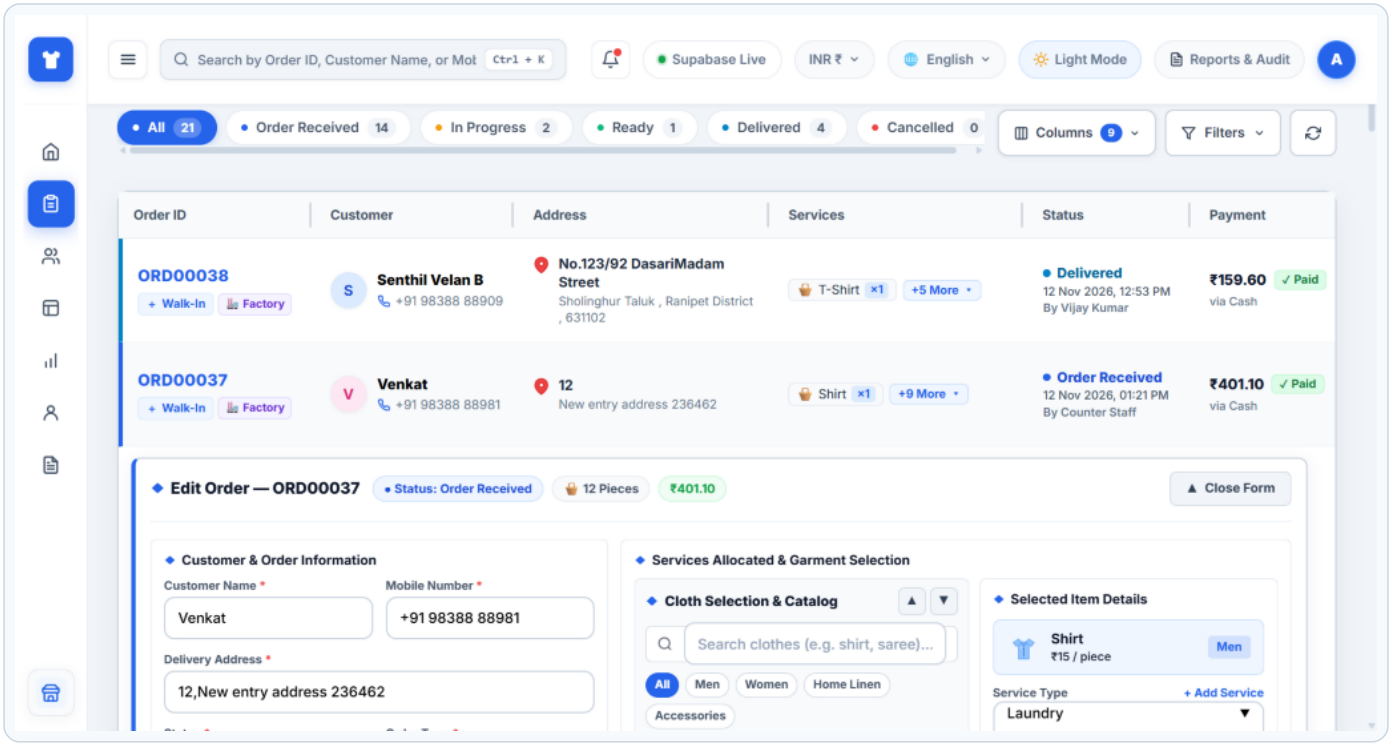

Key UI Elements, Fields & Actions

- Renders business branding, store address, GSTIN, order metadata, and customer details.
- Includes itemized garment lines, tax breakdown, payment confirmation, barcode, and QR code.
- Header/footer actions: Print Receipt, Download PDF, Share via WhatsApp, and Close.

08 Normal Edit Order Screen (Full-Page Inline Editor)

Component: POSModule.jsx (Inline Edit View)

Full-width inline editing workspace for modifying an existing order, updating garment quantities/services, recording garment inspection notes, and recalculating totals.

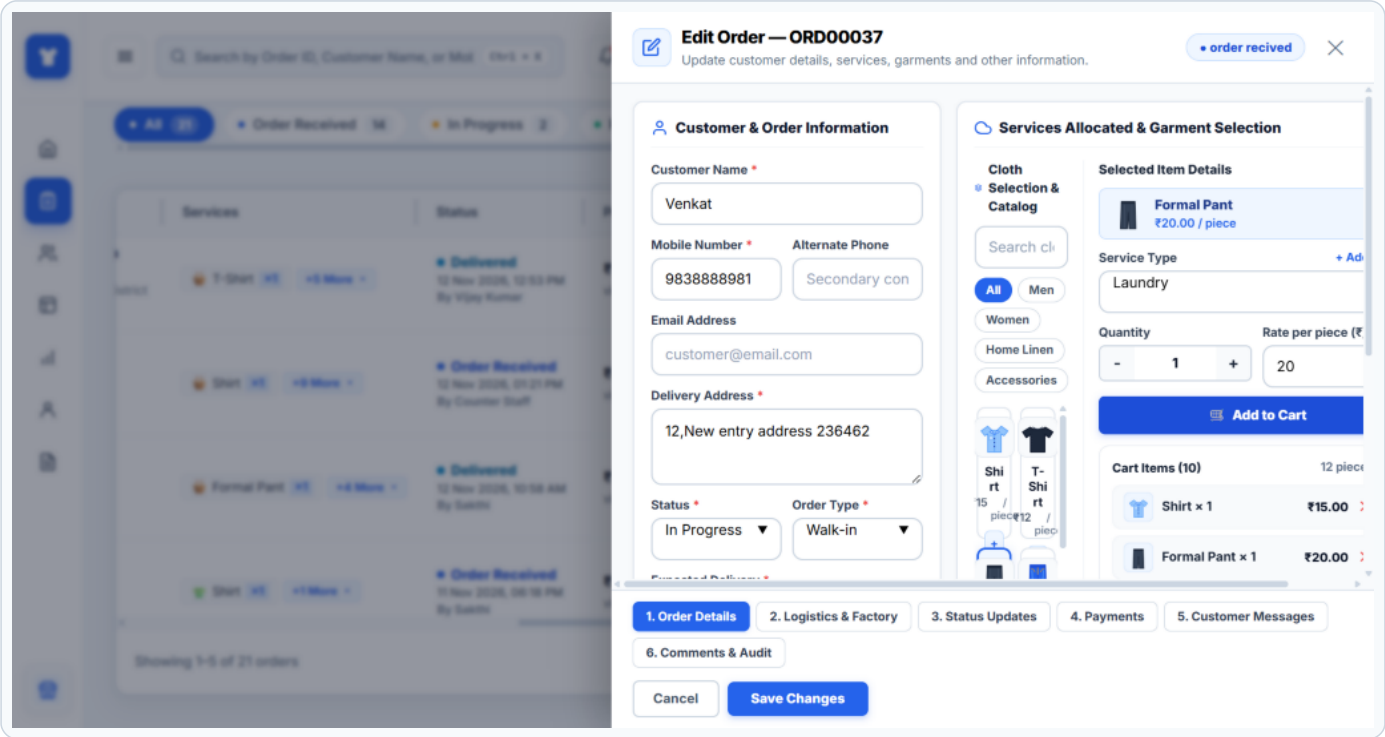

Key UI Elements, Fields & Actions

- Customer & Order Info: Channel selector, Attend Staff Name (persists attend_staff_id), and Assigned Pickup & Delivery Person (persists assigned_pickup_person_id).
- Garment Catalog & Service Cart: Add/remove garments, adjust quantities, and apply service types with live subtotal/GST recalculation.
- Garment-by-Garment Inspection: Record stains, defects, color/brand notes, and special care instructions.

09 Side Edit Panel (Quick Slide-Over Editor)

Component: SideEditPanel.jsx

Compact right-hand slide-over editor for fast order updates without leaving the Orders list.

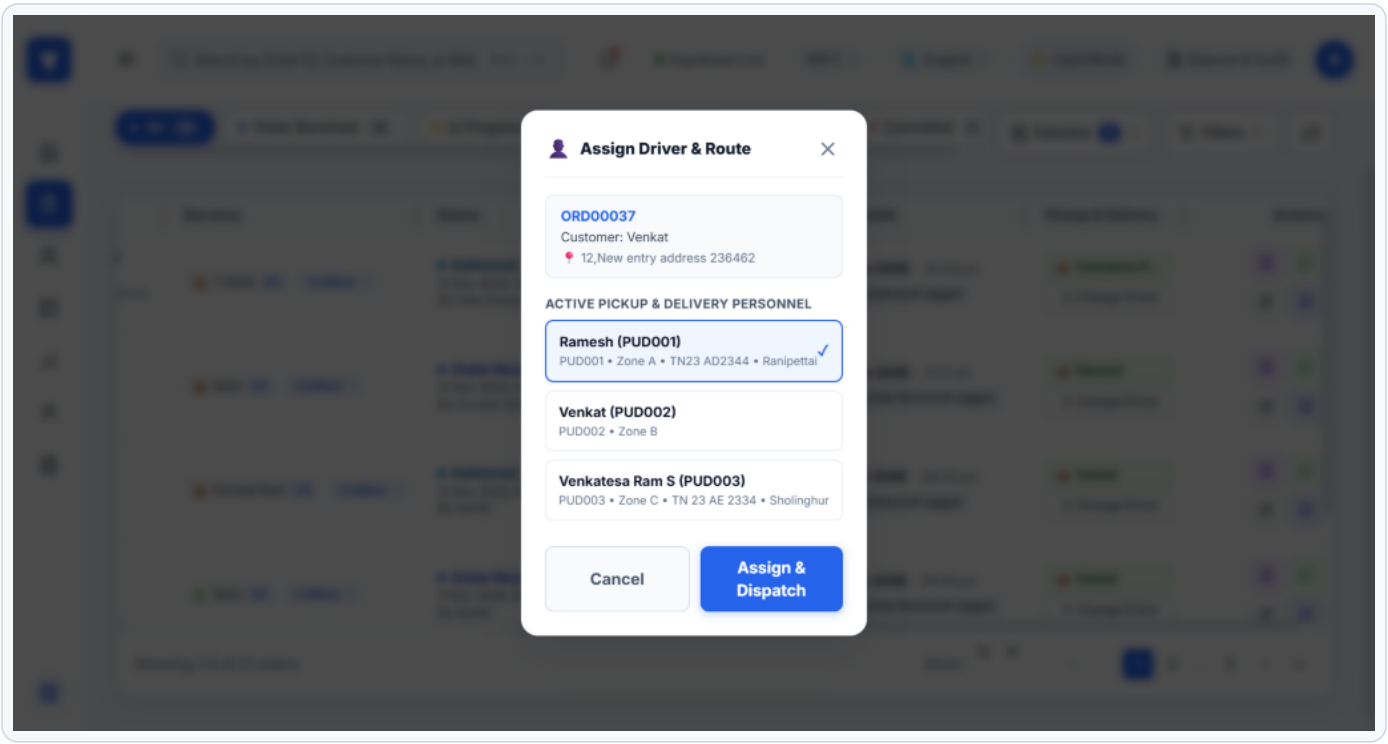

Key UI Elements, Fields & Actions

- Displays Order ID badge, customer contact info, and quick form fields.
- Supports editing Attend Staff, Pickup & Delivery Person, service allocations, and pricing.
- Persists attend_staff_id and assigned_pickup_person_id to Supabase on Save Changes.

10 Assign Pickup & Delivery Driver Modal

Component: DriverAssignModal.jsx

Dedicated dispatch modal for assigning or reassigning a pickup/delivery driver from the active Pickup & Delivery Master list.

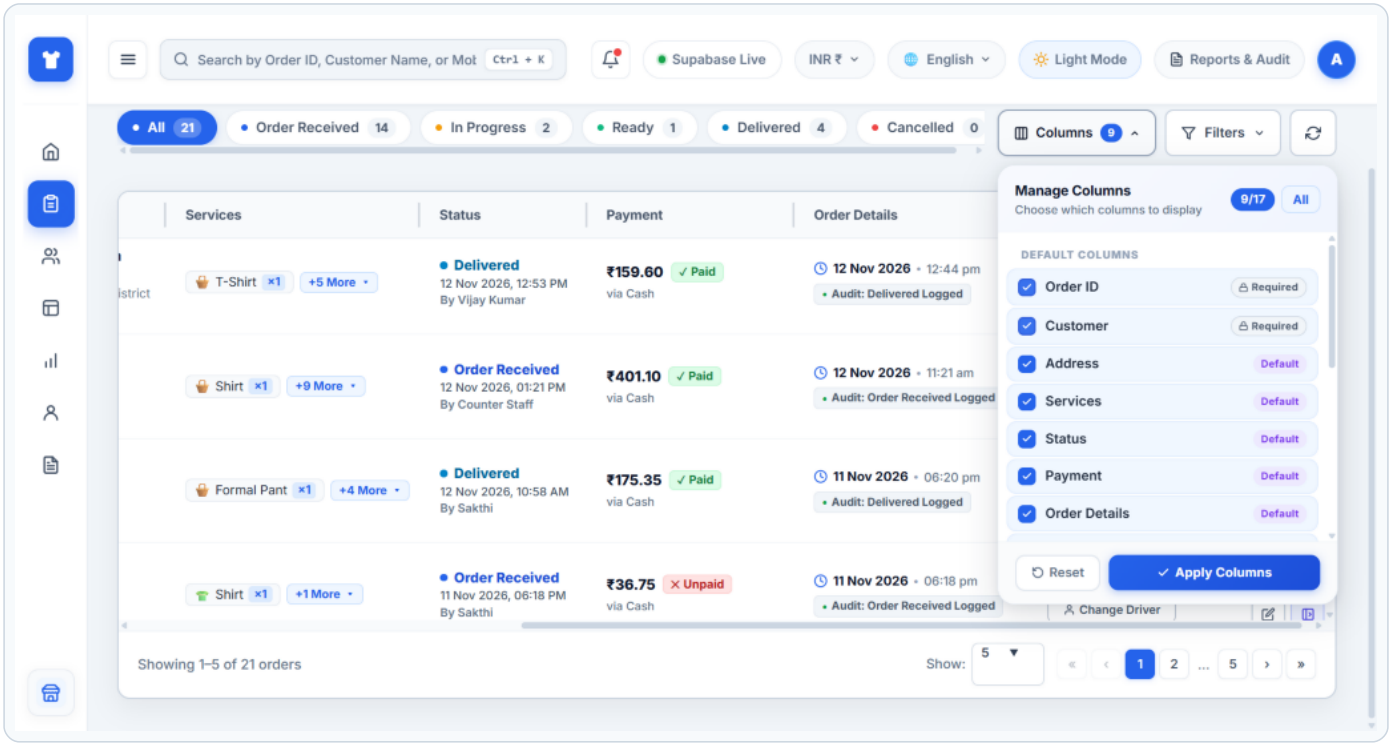

Key UI Elements, Fields & Actions

- Displays Order ID, Customer name, and destination address for quick route verification.
- Lists active drivers with Employee ID (e.g. PUD001), Zone, Vehicle Info, and active selection state.
- Saves both assigned_pickup_person_id and assigned_pickup_delivery_person on Assign & Dispatch.

11 Manage Columns Toolbar Popover

Component: POSModule.jsx + orderColumnsConfig.js

Column visibility and preference manager allowing staff to customize which of the 17 available order columns are displayed in the POS table.

Key UI Elements, Fields & Actions

- Shows active column counter (e.g. 9 / 17) and quick All / Reset controls.
- Separates Required columns (Order ID, Customer, Actions), Default columns, and Additional columns (Driver, Comments, PIN Code, Email, GST, etc.).
- Persists user column preferences via columnPreferenceService.
